

DESIGN X BUILD

ARCHITECTURAL/ENGINEERING DESIGN
CONSTRUCTION SERVICES

WE DESIGN THE LIFE OF THE FUTURE

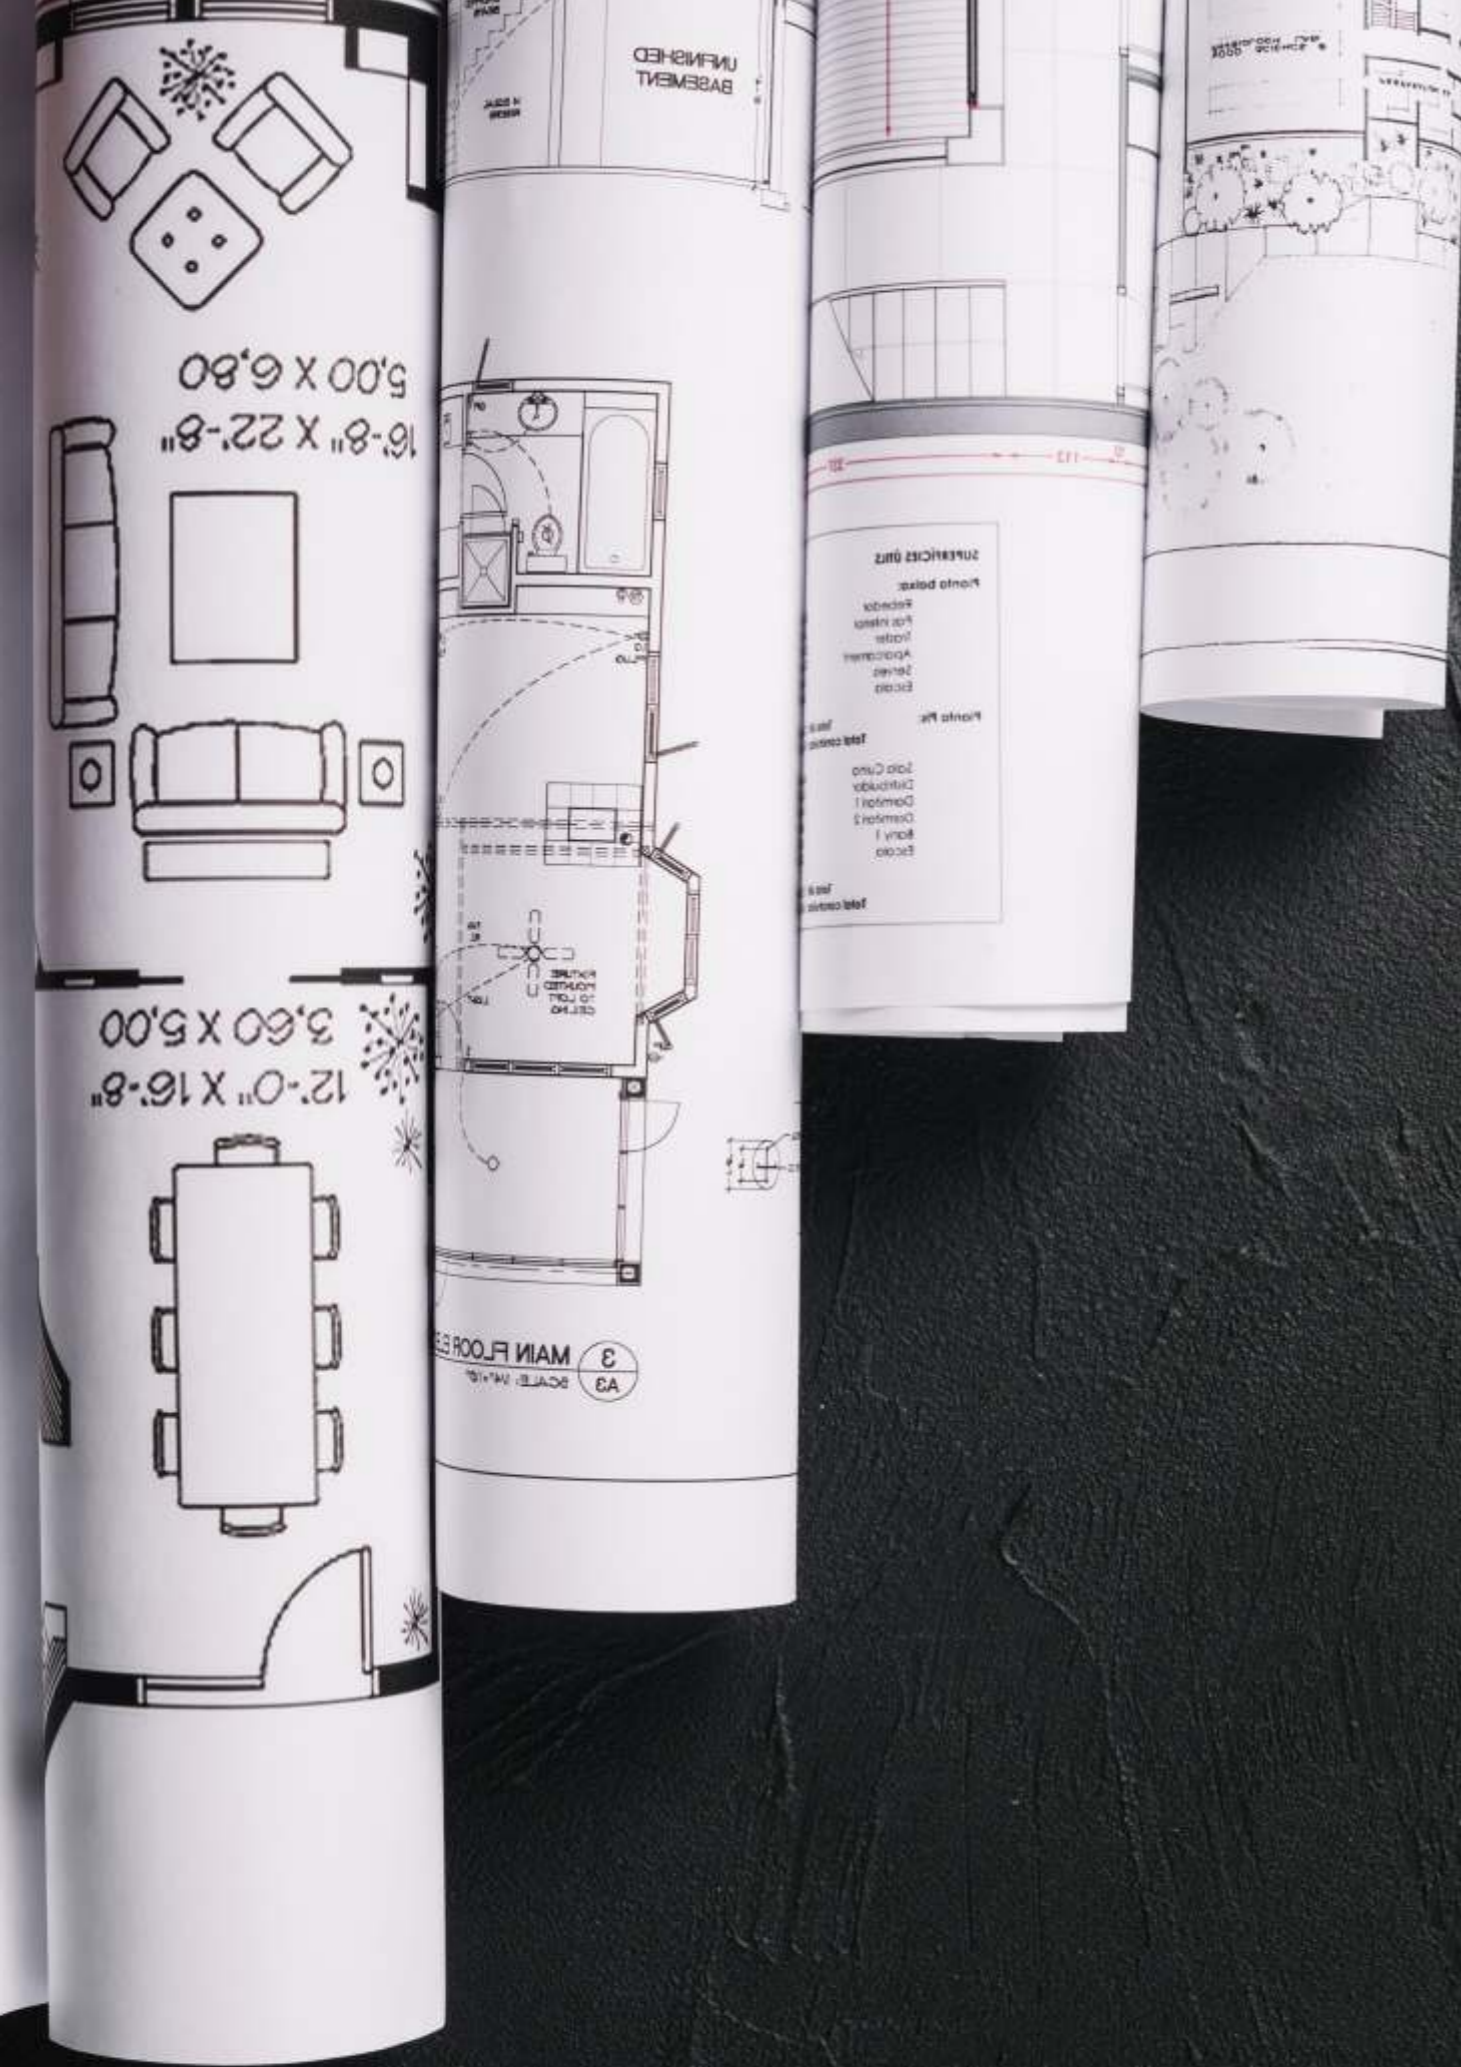

Taking into consideration each sector's unique "specific" conditions, as well as ensuring that all units and details are professionally applied, we produce heavy steel structures including factories, hangars, warehouses, sports halls and hotel complexes. We work on the principle of maximum efficiency in order to produce economic, fast, secure and robust constructions.

Under the umbrella term "light steel structures" we offer construction of residences, offices, public buildings, resorts and public housing projects.

Whether you need a single building or a building complex projecting functionality and aesthetic integrity, we are always a safe choice and we provide delivery on time.

DESIGN  BUILD

WHO ARE WE?

WHAT WE'RE DOING?

Design and Build is a design and construction company in Bosnia and Herzegovina. Our goal is to produce and implement fast, economical, reliable and appropriate solutions.

HISTORY

Since 2010 we have been with our group company specializing in construction and building materials. We have accomplished many projects in Bosnia-Herzegovina, Balkan region and Eastern Europe.

OUR SERVICES

Design and Build, as the name implies, has two main service areas. We carry out architectural and engineering design works, traditional construction methods and light and heavy steel application works. What makes us different is; to develop and implement projects in a fast, reliable and convenient way.

OUR PARTNERS

We are together with Acon Design and Management Company, which has realized many global projects in architectural and engineering projects.

For construction and steel production and application, we are together with Acon Steel, which has completed many successful projects in the field.

ARCHITECTURAL DESIGN

Your responsibility is just to provide us with the information about a desired building or a complex of buildings. Everything else, including project planning, architectural design, application and decoration is our job.

SERVICES

- Architectural projecting
- Interior architecture
- Landscape architecture
- 3D design and illustration
- Sketching
- Model making
- Controlling and supervision
- Quality control
- Project promotion and marketing

ENGINEERING SERVICES

We provide static, construction and structural engineering services.

Site controls, soil analysis, reporting and planning services are the main topics of our engineering services.

SERVICES

- Electrical
- Mechanics
- Static
- Infrastructure
- Topography and mapping
- Controlling and supervision

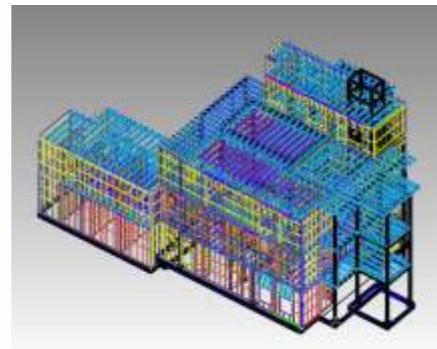

LIGHT STEEL

Under the umbrella term "light steel structures" we offer construction of residences, offices, public buildings, resorts and public housing projects.

Whether you need a single building or a building complex projecting functionality and aesthetic integrity, we are always a safe choice and we provide delivery on time.

HEAVY STEEL

Taking into consideration each sector's unique "specific" conditions, as well as ensuring that all units and details are professionally applied, we produce heavy steel structures including factories, hangars, warehouses, sports halls and hotel complexes.

We work on the principle of maximum efficiency in order to produce economic, fast, secure and robust constructions.

CONCRETE CONSTRUCTION

Whether you need coarse or fine concrete structures for your house, villa, office, businesses place, school, sports facility or any other kind of small or medium-sized project, we are the right solution for you.

Also; tunnels, highways, infrastructure works are also included in our service items.
